

THE WHITEPAPER OF FRENZ WITH MONEY

Yo FRENZ, it's simple: we're just a memecoin. You can either dive in now, grab your moon ticket, or read the whole whitepaper, get bored, and then grab your moon ticket. Either way, LFG! 🚀
Your move!

Whitepaper: FRENZ WITH MONEY

1. Introduction: Three FRENZ, One Dream, and Lots of Money

Meet FrenzWithMoney: the story of three FRENZ who went from broke to loaded by going all-in on a crypto presale. Now, they're giving you the same shot they had—with their own token. Sure, we're "just a memecoin." But don't be fooled—memecoins have made more millionaires than most "serious" projects. If you like things simple, direct, and maybe a bit crazy... welcome.

2. The Problem: Why Do the Rich Always Get Richer?

Presales often give the biggest rewards to the team and big investors. We're flipping the script, allocating 84% of our tokens to the community, not us. Most presales raise millions but only release 20-25% of tokens, creating a high market cap and making profits hard for early buyers.

Our approach? We're capping our FDV (Fully Diluted Valuation) at \$2.1 million at launch, keeping the target low for faster and easier growth. With the right marketing we can 10x this easily. While others aim for millions, our presale target is set at \$1,778,373 and we'll kick off as soon as we hit it. No drawn-out presales, no massive fundraising—just straight to the moon.

3. Our Mission: From the Community, for the Community... Get Rich Together

The mission of FrenzWithMoney is clear: fun, community, and yes, making money together. We're not trying to reinvent the wheel here, and we're not pretending to. We're being honest: this is just a memecoin, but one that can change lives. If you join us, you'll be part of a wild ride that promises to make some noise..

4. Tokenomics: Simplicity Can Be Powerful Too

No complicated formulas here. Our tokenomics are simple and effective:

Total supply: 7,777,777,777 tokens. Because we love to gamble.

84% in presale: You, the community, get almost everything.

5% for the team: The team's tokens will be locked for one year

1% for the community: Airdrops and Contests for early supporters

10% for liquidity: Strong markets on DEXs and CEXs from day one

5. "Just a Memecoin": And We Mean It

That's our tagline: "we are only a memecoin". But you know what? Memecoins have been incredibly powerful, making plenty of people rich in the process. We're not here to change the world—we're here to have fun and watch our numbers grow.

And if you still think "just a memecoin" isn't enough for you, well... maybe you missed out on Dogecoin and Shiba Inu. Here's your second chance.

6. Vesting Period: Planned to Avoid Chaos

Since we are just a memecoin, we know many projects crash hard on TGE (Token Generation Event) day. Why? Because tokens are unlocked all at once and people panic-sell. Not with FrenzWithMoney.

We will lock 100% of the tokens for 30 days. During this time, we will make massive marketing for more massive gains to make sure the market cap rises as expected. At the end of those 30 days, when your tokens are unlocked, the market cap will be so high you'll want to hold on a bit longer rather than sell them all at once.

7. Team Tokens locked: We Trust in Our Project

The team's 5% allocation is locked for a full year. We'll keep working according to our roadmap, building the FRENZ ecosystem, and pushing marketing without any team sales in the first year.

8. Marketing: Noise Is Everything in a Memecoin

We know what makes a memecoin take off: attention. That's why we'll launch a 500k marketing campaign. We're talking about campaigns with KOLs, influencers, strategic collaborations, and everything needed to make FrenzWithMoney the hottest topic in the crypto space.

9. Roadmap: Yes, We're Just a Memecoin... but We've Got Plans

As just a memecoin, we know the most important thing is to have fun and make money fast. But that doesn't mean we don't have a vision for the future. In fact, we're already working on several things to keep our community growing:

Phase 1: The Beginning of Everything! (Now)

1. **Presale Starts:** The presale is live! This is your moment—make history and grab your tokens before the FOMO takes over everyone else!
2. **Launch + Listings on DEXs:** The big day has arrived! After the presale, we officially launch the token.

Phase 2: Moonshot Moment (1-2 months)

3. **Epic Marketing Campaign:** During the token lock, we're investing \$500k in influencers, memes, and partnerships to create massive FOMO.
4. **Token Unlock:** After 30 days of building, your tokens unlock, and it's go time.
5. **Buyback and Burn:** Once the tokens are unlocked, we'll initiate our buyback and burn strategy to gradually reduce the total supply, increasing scarcity, driving demand, and creating sustainable value for our community.

Phase 3: Expansion and Fun (2-5 months)

- 6. **FRENZ NFTs:** Limited NFTs for our loyal holders.
- 7. **FRENZ Bot:** We introduce the FRENZ Bot for sniping and automatic trading. Let your money work while you relax!

Phase 4: From Memecoin to Ecosystem (5-9 months)

- 8. **FRENZ Swap:** A dedicated exchange for FRENZ tokens.
- 9. **FRENZ LaunchPad:** We also launch FRENZ LaunchPad, where we help other projects take off.

Phase 5: Dominating the Market (9-12+ months)

- 10. **Listings on Major Exchanges:** First we and then the world. Get ready to see us on Binance, Bybit, KuCoin, and more!
- 11. **FRENZ Universe:** Our vision of a complete ecosystem with a Launchpad, NFTs, DeFi, and more.

10. Governance: You Decide the Future of This Memecoin

By being part of FrenzWithMoney, you're not just a holder—you have a say in how things go. We'll implement a voting system where the community decides on important things. And if any other wild ideas pop up along the way, we'll decide together.

11. Security: We Take It Seriously... Even for a Memecoin

We're "just a memecoin", but we take security seriously. Our smart contract is audited, liquidity locked, and mint authority revoked. You're in safe hands.

12. Conclusion: We're Just a Memecoin, but...

Yes, we're just a memecoin—no fancy tech promises, no complex whitepapers. Our focus is simple: building a community, having fun, and creating opportunities for everyone involved. We're here to shake things up in the crypto world, all while keeping things as clear and straightforward as possible.

But while we're just a memecoin, we've got big plans. We're already working on exciting things like NFTs, a Trading Bot, an own Swap and more. All of this is to make sure that when you join, you'll want to stay and enjoy the ride.

So, are we just a memecoin? Sure. But we're also building something special. So if you're ready for a wild ride, come join us—let's make some noise and take this to the moon, together.
